Reply to D Strasmann

Dear David,

I write in reply to your request to use your private logger (an FAI Logger) for scoring task 7 (Flight 3).

May I draw your attention to the Statement in the General Briefing regarding the use of a backup logger in terms of (a) set-up, and (b) basis for reporting any problem with a back-up logger.

It appears that you did not report the problem to the Deputy Chief Scorer immediately upon discovery that the logger did not work when attaching cable to USB port, at least not until after the flight.

Upon inspection of the official logger by the Deputy Chief Scorer, it was not possible to reproduce the failure in the official logger (see Rule 6.13, and notably 6.13.1) after the flight.

Since no failure was found, I regret that I am therefore unable to proceed further with your complaint. The result will stand.

David Bareford, Event Director.
