Respectful flying score

$$RFS = 1 - \frac{\text{Total of all RFS-penalties of the past 24 months}}{1500} \text{ in \%}$$

RFS is a persistent pilot penalty, calculated and shown in WMF.

Penalties accounted for RFS:

10.1 Balloon collision

10.2 Dangerous flying

RFS = 0% → no start in CAT1 or CAT2 events

Green

You currently have no penalties in the last 24 months that have deducted points from your RFS.

Respectful Flying score (RFS)

Source: [FAI Competition Operations Handbook Version 2024](#)

When a pilot is penalized for an incident, he is penalized upon a decision by the event director. The RFS is a well-defined and well-working scheme and does not need any change. The existing penalty types "task point penalty" and "competition points penalty" will also remain.

The event rules will clearly determine which penalties (by rule or upon director's decision) will be marked as "counted for respectful flying score". The attributed task or competition points will then automatically be flagged as such and later used to calculate the "Respectful Flying Score".

A pilot's "Respectful Flying Score" (RFS) will be 100% if he has received no penalties in the past 24 months. The score will decrease with each penalty and will be calculated according to the following formula:

$$\text{RFS} = 1 - (\text{Total of all RFS-penalties of the past 24 months}) / 1500 \text{ in \%}$$

RFS cannot be below 0%

Example: A pilot has the following RFS-flagged penalties applied to his scores in multiple events in the past 24 months :

Event A – task 3 : 200 points under rule 10.1

Event A – task 12 : 150 points under rule 10.2

Event B – task 2 : 250 points under rule 10.2

Event C – task 5 : 200 points under rule 10.2
